DETAILED ACTION

Response to Amendment

The amendment filed on December 3, 2004 is sufficient to overcome the prior art reference.

Response to Arguments

Applicant's arguments, filed December 3, 2004, with respect to claims 1 and 16-18 have been carefully considered and are persuasive. Accordingly the rejections with regard to claims 1-8 and 16-18 have been withdrawn.

Allowable Subject Matter

Claims 1-8 and 16-28 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art of record does not disclose an *adjustment mechanism coupled to the glider and configured to adjust the position of the glider relative to the arm* as set forth in claim 22.

The prior art reference, Reed et al. discloses two opposing platens (12, 14) wherein a movable platen (12) is driven towards a fixed platen (14) to form a press. The movable platen is driven via a drive mechanism. Reed also disclose an additional biasing means (36), wherein the means for biasing is a spring used to further bias the movable platen towards the fixed platen for applying additional force for pressing. Moreover, Reed teaches the means for biasing to be

coupled to the press platens via a glider and arm (18, 34). Reed however is silent to any adjustment mechanism.

Neither the prior art of record nor any combination thereof discloses for fairly suggests the claimed invention as set forth in claim 22. Accordingly claim 22 and its dependents are allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
